DETAILED EXPERIENCE

Longenecker & Associates

2015-Current

Director, Contractor Assurance System & Quality Assurance – WSI, Las Vegas, NV

2013-Current

Responsible for development, implementation, and direction of Contractor Assurance System & Quality Assurance (CAS&QA) programs to ensure compliance with Department of Energy, National Nuclear Security Administration, and WSI-Nevada directives and contract requirements. Oversaw execution of the WSI-Nevada CAS and QA programs, the Requirements Management System, Operations Security, and Incident Reporting programs. Oversaw and conducted assessments of policies, procedures, and processes of operations, administration, and all other company functions as needed and ensured proper reporting as required. Oversaw the development and deployment of a Contractor Assurance Reporting System to provide performance measure electronic transparency to federal oversight staff. Assisted in business planning and implementation for the Company. Oversaw the conduct of compliance assessments and quality performance improvement programs and maintained the issues management

and corrective action tracking system databases. Oversaw and conducted inquiries and investigations as required. American Society for Quality Certified Quality Auditor; National Malcolm Baldrige Quality Award Examiner; DOE and Nevada State Quality Awards Examiner, Judge, and examiner trainer.

Quality Assurance Manager – WSI, Las Vegas, NV

2000-2012

Managed and conducted compliance assessments and quality performance improvement programs. Developed and maintained the issues management and corrective action tracking system databases. Performed project management, risk and causal analysis, trend and deficiency analysis, investigations, safeguards and security and explosives safety assessments, and managed the suggestion and lessons learned programs. Led, facilitated, and monitored strategic planning and benchmarking for the company. Oversee technical standards management and developed facilities design and approvals. Worked with Environment, Safety, and Health staff to ensure Integrated Safety Management and Conduct of Operations standards were met. Chartered, led, and participated on multi-faceted teams to assess compliance with Safeguards and Security and other DOE regulations to ensure protection of the public, the environment, and DOE assets and interests. Managed quality assurance programs and helped develop programs and processes to address Defense Nuclear Facility Safety Board concerns dealing with federal oversight and contractor assurance. Selected to assist an overseas contractor in Iraq in analyzing system improvement opportunities to address client concerns. Attended the federal DOE Accident Investigation Course and numerous Incident Management and Business Continuity courses. Assisted in developing the company Continuity of Operation Program Plan. Worked closely with QA contractor counterparts, as well as federal employees and leadership, throughout the DOE complex. Established sister-site crosstalk meetings to exchange lessons learned and best practices. Participated in DOE-wide and site-wide program development and process improvement projects and programs, such as the Energy Facility Contractors Group and Nevada Site Office development and implementation of the DOE Governance Reform Initiative. Outstanding writer and editor. Excellent communication and computer skills. Selected by the company to develop and conduct training courses for employees from staff to technical and protective force personnel. Courses developed and/or taught include topics such as communication skills, teambuilding, security and accident investigation, conducting assessments, strategic planning, employee safety, organizational roles and responsibility, human performance improvement, and quality improvement.

Adjunct Faculty – University of Phoenix, Las Vegas, NV

1997-2007

Prepared curriculum and online, classroom, and independent study taught courses in political science and all communication skills. Always received high scores and favorable comments on student feedback reports and faculty evaluations. Students are working adults seeking higher educational goals. Classroom instruction is facilitated student learning designed to maximize the work experience in the learning environment. Developed presentation aids and assisted students in developing presentations.

Claims Adjuster – Allstate Insurance, Las Vegas, NV

1998-2000

Collected data on accident claims from insured clients and injured claimants. Investigated accident details and analyzed causes to determine liability and extent of damage and injury. Handled all types of claims, from simple vehicle or property damage to fatalities. Handled all aspects of claim settlement,

including vehicle repair, injury and medical treatment settlement, and associated costs for rental vehicles, lost wages, and other property damage. Conducted interviews and did scene investigations to support analysis. Management evaluated my liability assessments as always accurate due to the level of analysis put into every case. Analyzed data for signs of fraud and determined fair settlement offers based on reasonable and customary criteria. Negotiated claim settlements and closed on settlement offers. Maintained one of the lowest attorney referral rates due to ability to maintain rapport and confidence. When difficult clients or claimants were encountered, their cases were often transferred to me for handling because of my personality and ability to establish rapport, earn confidence, and resolve issues and conflicts in a professional and caring manner.

Aircraft Maintenance/Logistics Officer – U.S. Air Force

1978-1997

Retired Lieutenant Colonel with 22 years of service in a broad spectrum of field and staff experience positions. Excellent leadership, management and training experience. Hands-on leadership style. Outstanding communication and interpersonal communication skills.

- **Logistics Support Squadron Commander and Deputy Commander for Logistics (Supply, Transportation, Contracting)**. Designed aircraft maintenance support facilities. Oversaw training programs for over 4000 maintenance and logistics personnel in a variety of duty positions and skill levels, and headed the Mission Ready Crew Chief technician preparation course for all Air Force F-16 maintenance crew chiefs. Responsible for managing a junior officer professional development program to ensure they received a broad perspective of operations and mentored their training. Managed all manpower and resource requirements for the logistics complex, including command staff and six squadrons. Served tours in the U.S., Japan, and Saudi Arabia and worked with government officials and agencies at all levels. Oversaw aircraft logistics and maintenance for numerous units from initial bed down to wing closures. Served on contractor performance review boards and award fee determination committees.
- **Aircraft Maintenance Officer**. Managed fighter aircraft maintenance in a broad spectrum of areas from flightline to maintenance support squadrons to command staff. Duties included quality assurance, safety, resource management, training, and mobility. Supervised and led personnel actions from small staff administrative functions to multifaceted aircraft shops and flightline support units with almost 200 personnel. Oversight included civilian personnel and contractors. Investigated accidents and technical issues to determine causes and make recommendations. Conducted investigations and inspections.
- **Air Command & Staff Faculty**. Served 3 years in curriculum development & instructor. Developed curriculum using the Systems Approach to Training (Instructional Systems Development) processes for 44 faculty-led seminars. Provided assistance to faculty in execution of educational requirements and classroom instruction. Led in-service training in communications skills and evaluation standards and techniques. Lectured to audiences as large as 500 students and led small classroom seminars of 12 to 15 students. Instructed military students from fifty international countries. Developed and conducted a 2-year research project to examine the link between communication skills (reading and writing) and academic performance and made recommendations to assist students with a higher potential for academic failure to increase their opportunity for success. Developed remedial courses to help

students improve academic performance skills and increase their professional capability. Developed testing instruments and student performance measures, and evaluated results to determine effectiveness of learning methods as well as test validity. Served on accreditation preparation team.

EDUCATION**Auburn University at Montgomery**

Master of Arts in Political Science, 1992
