

Longenecker & Associates provides highly experienced support to its clients with significant construction, facilities and infrastructure responsibilities to help them ensure that their facilities operate in a safe, cost effective and efficient manner.

Capabilities

Our staff includes experts with decades of construction and facilities management experience within DOE, DOD and the private sector. Our experience ranges from project manager to program executive and owner levels. Key areas of support include:

- Facilities and infrastructure strategic planning, acquisition and management
- Facility and utility condition assessments
- Facilities sustainment cost modeling
- Risk management, project controls and scheduling
- Real property asset identification and reliability centered maintenance programs
- Critical spares programs
- Benchmarking and management and technical assessments
- Work order planning and control

Project Experience

Recent projects undertaken by L&A include;

- Managing DOE contracted facilities organizations
- Navy Public Works Departments and Base Operating Support contracts at DOD sites.
- Support to the M&O Contractor transition at Sandia National Laboratories (SNL) by conducting facilities and infrastructure assessments
- Support to improvement initiatives within the SNL Facilities and Infrastructure Division in areas including strategic planning, centralized facilities management, sustainment cost modeling, work planning and control, benchmarking and assessments, and risk management.
