Currently holds an active Department of Energy 'L' security clearance. In previous positions, held and maintained a Department of Energy "Q" security clearance and a Department of Defense "top secret" security clearance.

DETAILED EXPERIENCE

Program Manager – Longenecker & Associates, Inc.

March 2015-present

- Versatile, results-oriented management abilities provided exemplary contract support to NNSA Office of Secure Transportation for Administrative Support Services taskings, including the management of administrative support roles for federal senior management; project management and budget analysis and development; federal payroll data entry; travel voucher processing; technical editing/writing; and requisition processing and invoice tracking.
- Established and maintained effective, open lines of communication between OST federal offices and contractor personnel. Resolved potential conflicts on a variety of financial, administrative, and personnel related functions by mediating differing opinions into acceptable compromises through the use of strong interpersonal skills and organizational experience.

Business Manager and Environmental, Safety and Health Coordinator – Innovative Technology Partnerships, llc.

November 2011-February 2015

- Created and oversaw preparation of contractual management reports, subcontract reports, labor and cost plans. Provided active supervisory skills and oversight in the areas of payroll, accounting, budgeting, records management, contractor purchasing, worker's compensation, travel, security clearance administration, human resources and benefits counseling.
- Planned, developed and implemented ESH programs to ensure compliance with federal, state, and local laws. Conducted in-depth program level ESH assessments in support of ITP objectives. Advised contract partners, managers, coordinators and employees on worker safety programs.

Environmental, Safety and Health Coordinator – Epsilon Systems Solutions, Inc.**November 2009-November 2011**

- Developed and implemented viable OST contractor safety program to expand and enhance contract worker safety and health. With the unique involvement and oversight of program managers and corporate partners, safety initiatives were communicated throughout all functional areas.
- Authored contract ESH Plan and five foundational safety processes and written programs. Authored initial creation of four OST standard operating procedures for motor carrier and driver operations, including Transportation Security Plan, hazardous material transportation and basic driver requirements.
- Personally supervised ITP's successful completion of US DOT Federal Motor Carrier Safety Administration compliance review of motor carrier and driver operations. A significant accomplishment in maintaining top-notch logistical support to OST, the company received a "Satisfactory" safety rating and federal authorization to conduct operations under US DOT #1948262.

Contract Munitions Coordinator – Wackenhut Services Inc.**November 2003-October 2009**

- Directly responsible for the overall operation of the OST Munitions Management Program which included developing, operating, planning and coordinating munitions and pyrotechnic support efforts for OST operations and training. Efficiently managed OST's munitions stockpile, located on 4 sites within 12 facilities; and assured the proper shipment, storage, accountability, receipt, delivery and transportation of over 19 million explosive items.
- Developed and implemented contractor specific operational procedures for onsite and off-site logistical support of OST training events, meeting requirements for DOE and DOD installations. Included developing and initiating quality based logistic programs and processes, inspection and certification programs for administering and controlling government owned property.
- Authored initial creation of OST Manual 5.16 Munitions Management System detailing specific procedures for munitions operations, including planning, storage, transportation, and inspection. Identified requirements and facilitated implementation of WSI motor carrier and hazardous material program that resulted in a successful 2008 safety audit by DOT FMCSA auditors.

Munitions Systems Manager – United States Air Force**August 1981-November 2003**

- Accumulated a wealth of experience/knowledge during an exemplary career of 21 years in a variety of logistics management functions in positions of increasing responsibility.
- Provided munitions management and technical expertise to USAF installation support commanders in logistics, security and flight line operations. During tenure (1998 – 2003) at Kirtland Air Force Base,

appointed installation Munitions Flight Chief and Munitions Accountable Systems Officer responsible for oversight of base activities involving munitions management operations.

- As Flight Chief, implemented and assessed squadron level personnel and operational programs; included developing administrative procedures for personnel reliability programs, human resources and quality management processes; supervising and training personnel on functional area responsibilities and requirements to meet mission objectives.
- As Accountable Systems Officer, directly responsible for establishing inventory management policy and procedures for munitions accounting during peacetime and contingency military operations.

SPECIALIZED TRAINING/PROFESSIONAL DEVELOPMENT

- University of Maryland/Community College of Air Force /USAF Senior Academy courses in leadership, management, military studies, supervisory training, oral and written communication, computer studies, American and world history, and classical literature
- Government Property Accountability and Business Systems (DOD, DOE)
- Integrated Safety Management, Operational Risk Management, and Worker Safety and Health (DOD, DOE)
- Motor Carrier Management and Hazardous Material Transportation, General & Explosive (DOD, DOE, DOT)
