

High-Hazard Operations Support

L&A has 30 years of experience across the DOE and NNSA complex supporting safe operation of high hazard facilities and performance of complex activities to improve mission performance. Our highly skilled, experienced and motivated professionals have worked across the full cycle of nuclear operations and enabling programs, both internationally and domestically. They bring a wealth of experience and insight to bear to on-the-ground operations and safety and radiological program planning and management. We also support emergency management, training and qualification and independent reviews, as well as develop and implement improvement plans to deliver safe and effective results, while ensuring compliance with contractual and regulatory requirements.

Capabilities

L&A has an experienced team of professionals who have managed across critical operations functions in areas including:

- **Conduct of operations**
