L&A Hosts Exceptional Group of Radiation Control Technicians at their Los Alamos Office

LOS ALAMOS, NM—L&A, in association with their strategic partner, Spectra Tech, recently held a team get-together at their Los Alamos office with more than 25 of the Radiation Control Technicians (RCTs) who are supporting active work at the Los Alamos National Laboratory. The RCTs have an average of more than 25 years' experience at Government and civil nuclear sites across the U.S. and are fulfilling an urgent need at the site.

This support to LANL is L&A's fastest growing task and currently has 35 full time participants with plans to increase that to at least 50 in FY2020. The event was supported by Senior L&A management including George Rael (TRIAD Program Manager), Mike Briggs (Group VP, High Hazard Operations), Arnold Guevara (TRIAD Deputy Program Manager), Laurie Judd (VP, Corporate Programs) and Brian Bielecki (Group VP for Mission Assurance) as well as Erik Vogeley (VP, Technical Services) at Spectra Tech. Bielecki addressed the team and stressed that their role is critical to both DOE and to L&A and that we are working exceptionally well as an integrated team.

Founded in 1989, Longenecker & Associates celebrated its 30th anniversary last year. L&A leverages that experience throughout the nuclear security and cleanup enterprise to improve mission performance, deliver capital asset projects to schedule and budget, implement effective governance approaches and develop targeted business strategies for both large and small businesses.

L&A also places a strong emphasis on community and educational giving, providing more than \$1 million over the last decade in undergraduate and graduate scholarships, STEM programs and community assistance.
